Thank you for choosing the Fleet Management plugin for RISE CRM. If you have any questions that are beyond the scope of this help file, please feel free to email us via the support item on Codecanyon.

A) Upload & activate the plugin

* Prior to starting the installation, please make sure that no `open_basedir` restriction is applied to your PHP configuration and that `shell_exec` is enabled. Whereas 95% of the hosting providers around got a proper config that includes the above guides, you may need to adjust your PHP configuration settings if your provider offers these settings disabled by default.

- Steps of Installation:

1. Extract your downloaded file content. You will notice a folder called "**documentation**" and a new zip file called "**upload.zip**". Since the "**documentation**" folder contains documentation files and helpful instructions that are not needed in your RISE CRM's installation, we will focus on the "**upload.zip**" file.

Name	Size	Packed	Type	Modified	CRC32
..			File folder		
documentation			File folder	09-May-20 7:2...	
upload.zip	89,929	83,101	WinRAR ZIP archive	09-May-20 8:0...	0F3E5E9E

2. "**upload.zip**" contains the plugin files (in a plugin format) that you upload in RISE CRM's Plugin installation section.

Name	Size	Packed	Type	Modit
..			File folder	
documentation			File folder	09-Mi
upload.zip	89,929	83,101	WinRAR ZIP archive	09-M

3. Go to your RISE CRM's Admin area and select the following menu item: **SETTINGS > PLUGINS.**

4. Select the extracted **upload.zip** at the Plugin installation selection prompt and press **INSTALL.**

5. Find the newly installed plugin and press **ACTIVATE.**

6. You will be told that the plugin is successfully activated.

B) How to use the Fleet Management plugin
